**Description:** Spectrum Elastomeric Finish is a 100% acrylic base, elastomeric, weather resistant wall coating. This product is available in 3 textures and 30 standard colors. AHI also offers custom color matching performed by our factory trained technicians.

**Uses:** Used as an interior or exterior decorative coating on any cementitious surface such as stucco, block, poured concrete and masonry surfaces.

**Coverage:** Coverage varies depending on finish selected. Adobe Finish: 90 – 120 sq. ft.; Sand Finish: 100 – 130 sq. ft.; Medium Finish: 90 – 120 sq. ft.

**Dry Time:** Coatings will dry to the touch in 3 to 4 hours at 70º F. Protect coatings from rainfall for at least 24 hours after application.

**Job Conditions:** Air and substrate surface temperature must be 40ºF or higher and remain so for a minimum of 24 hours.

**Precautions:** Use adequate ventilation. Keep away from small children. Harmful if swallowed. Contact physician or poison control office immediately if ingested. Dispose of in accordance with local, state and federal laws.

**Surface Preparation:** Clean area and remove all dust, grease, oil, paint, dirt, efflorescence and any unsound concrete. Spectrum tintable primer must be applied over all cementitious products once they have been allowed time to cure. Primer must be applied with a spray application and then back rolled with a paint roller. With a pH pencil, check the surface pH levels 4-6 hours after the primer has dried. Dry time will depend on surface temperatures, humidity and porosity of material to be coated. Randomly check the entire surface to ensure pH levels are below 10.

**Light Reflectivity:** Spectrum Coatings use high quality pigments to tint the finish coatings. Ultra-violet and sunshine exposure can and will cause fading issues over time. To help minimize fading, light colors should be selected. Light reflectance values are rated 100% white - 0% black. The higher the lightness value, the less fading occurs. Dark colors (light reflectivity less than 20) will fade more rapidly than light colors. Spectrum Acrylic coatings are more resistant to fading than elastomeric coatings.

**Mixing:** Mix for 5 minutes with paddle mixer.

**Application:** Apply with stainless steel trowel to a thickness of the largest aggregate. If using a plastic trowel, float the finish in a figure eight motion, only stopping at natural breaks such as corners, expansion joints, etc.

**Clean Up:** Clean tools and equipment with water immediately after use.

**Storage & Shelf Life:** Store off the ground in a dry area. Protect from extreme heat, moisture, direct sunlight and freezing temperatures. Product can be stored for a period of 12 months in original un-opened container and protected from moisture. After opening, Spectrum Elastomeric Finish will keep for several weeks if stored and resealed properly.

**Weight & Packaging:** Weights vary due to pigment content. Packaged in 5 gallon pails, 36 pails per pallet.

**DO NOT USE THIS PRODUCT AS A COMPONENT OF AN EXTERIOR INSULATION FINISH SYSTEM (EIFS) OR AS PART OF ANY EXTERIOR INSULATION FINISH APPLICATION REPRESENTED TO BE A SIMILAR GROUP COMPONENT BASED SYSTEM.**
EIFS refers to an exterior insulation system in which the specific components are designed, formulated, tested and may also be certified by “EIMA”, “ICBO” or other organization to ensure that the individual components are compatible with one and another and will successfully function together. All AHI products are sold independently and separately and have not been tested, designed, formulated, manufactured or certified by any entity to work together successfully in Exterior Insulation Finish Systems or as a part of any exterior insulation application represented to be similar group component based system.

**Warranty:** All Spectrum stucco coatings come with a limited 5 year warranty.
