### **Common Nail**

#### **Product information:**

We propose to furnish our common nails, that we manufacture & or supply from our Alvin Texas facility. For construction, carpentry, and framing. Galvanized coating and larger shank provide greater strength. Made to conform to ASTM F1667.

These nails are made of a galvanized material and have been furnished on countless masonry projects throughout the area, for over twenty years. Should you need samples of this product, references or if we may be of service to you in any way, let us know. Please note that this product does not contain any asbestos, PCB's or other hazardous materials.

- Electrogalvanized
- Hot Dipped Galvanized
