

Austin Tan

Texas Tan

got color?

Do you want your next masonry project to be spectacular and stand out from the crowd? If you do, consider using Spectrum colored cements.

A typical masonry wall is made up of approximately 20% mortar. Masonry walls laid with colored mortar can give you the curb appeal you're looking for. AHI Supply offers a wide array of colored cements to choose from that can compliment any brick, block, natural or synthetic stone project. Call us at one of our offices below for more information.
