

## Approximate Coverage Data for Spectrum Cements

### Thin Veneer application with Scratch & Brown

Product	Application	Package	Thickness	Coverage
Spectrum Scratch & Brown	used to adhere the veneer stone to wall	75lb bag	3/4"	45sf per bag
Spectrum Scratch & Brown	used to adhere the veneer stone to wall	75lb bag	3/8"	90sf per bag
Spectrum Sanded Scratch & Brown	used to adhere the veneer stone to wall	80lb bag	3/4"	8 to 9sf per bag
Spectrum Sanded Scratch & Brown	used to adhere the veneer stone to wall	80lb bag	3/8"	16 to 18sf per bag

*Often times 3/8" scratch coat is used over lath and then 3/8" is applied to the back of the stone (brown coat), or 3/4" total.*

*The scratch coat 75 lb bag is typically mixed with 3-3.25 cubic feet of damp loose sand, brown coat is typically mixed with 2.75-3 cubic feet of damp loose sand.*

### Mortar Joints for Thin Material

Product	Application	Package	Thickness	Coverage
Spectrum Masonry / Portland & Lime Cements	thin veneer stone, mortar joints for thin material*	70-75lb bag	NA	85 to 125sf per bag
Spectrum Masonry / Portland & Lime Cements	thin brick, mortar joints for thin material*	70-75lb bag	NA	105 to 165sf per bag
Spectrum Sanded Masonry / Portland & Lime	thin veneer stone, mortar joints for thin material*	80lb bag	NA	29 to 44sf per bag
Spectrum Sanded Masonry / Portland & Lime	thin brick, mortar joints for thin material*	80lb bag	NA	37 to 58sf per bag

*\*water added as needed per masons' preference, one part acrylic admix may be used with 3 parts, up to 8 parts water.*

*Spectrum Masonry or Portland & Lime Cements, 70 or 75 lb bags, should be mixed with at least 2.25 cubic feet of damp loose sand.*

*Note: the coverage estimates are dependent on the mason, waste, and thickness of the stone or brick.*

*Please make sure the manufacturer's installation instructions for veneer stone and thin brick are always followed.*

*Mix all cementitious materials thoroughly.*
