Subject: The following material that we are submitting for construction approval

Project:

Texas Lehigh Type N Masonry Cement

We propose to furnish this product which is manufactured by The Texas Lehigh Cement Company of Buda Texas. Texas Lehigh is one of the largest producers of cement in the state of Texas. Our company has been supplying this product for over twenty years, with positive results. Chances are good that you have seen some of this widely used material on previous jobs.

This product conforms to ASTM C-91, and the proportions of ASTM C-270. Each 70 pound bag of this is to be mixed with three cubic feet of masonry sand to produce a high quality Type N mortar.

Note that the **laboratory only test procedure ASTM C270** states in section 1.4 that “This standard is not a specification to determine strengths through field testing” and the **field-testing procedure ASTM C780** states in section 1.4 that “The test results obtained under this method are **not** required to meet the minimum compressive values in accordance with the property specifications in Specification C270”.

Should you need samples of this product, Material Safety Data Sheets, mill reports, references or if we may be of service to you in any way, please let us know.

Thank you for the opportunity of furnishing this quality product on your important project! We look forward to working with you all!
